

Pelf Infotech Private Limited

- A Quality-driven IT Engineering Services Company
- Strategic Alliances with Leading Technology Partners
- Experts in Project Management with Well-established Process
- Stringent Security Procedures

Pelf Infotech Private Limited, a Quality-driven IT Engineering Services Company.

We are the Technology and Software Sales partner (VAR) for Dassault Systemes' SolidWorks Corporation, USA for the sales & promotional activities of SolidWorks Products in India .

Pelf Infotech Private Limited was started in 2002 with a vision to become a solution center for all CAD requirements. Equipped with hi-tech computer systems and software, we offer solutions that can boost the business of our clients. We have the ability to cater to all the hi-profile and precise needs of our clients and furnish them accurately within the estimated time and budget. With our technically sound engineers' team and with office in state-of-the-art facility in Pune, India, we serve our clients worldwide.

PIPL has an experience in a range of working with consultants, contractors, Government organizations, architects, engineering units, etc. We have successfully accomplished Turnkey projects related to Mechanical Engineering, Civil Engineering, Architecture and Electrical Engineering. Our services are customized to each specific requirement and supporting/ managing projects during all the stages of the design process on various design/analysis Software.

Our aim is to provide design, development and training assistance to industry with the help of various engineering tools and to become the trusted partner for companies in carrying out their Engineering Design activities.

- 
- CAD Services
 - Corporate Training
 - CAD Customization / Automation

Services at Pelf

Our value added services includes

- 3D Modeling - an essential service for advanced engineering projects
- Solid Modeling
- Surface Modeling
- Assembly Modeling
- Parametric Designing
- 2D Drafting, 2D to 3D Conversion of Design Data
- Validation of 2D Design Data
- Component / Assembly Drawings
- Tooling / Manufacturing Drawing

✦ Design & Detail Engineering of Components

- Die Design, Jigs & fixture Design (BIW)
- Product Development

✦ Design Validation

- Structural Analysis
- Thermal Analysis
- Mechanical Design
- CFD Analysis
- Design Optimisation

CAD Software Facilities

- SolidWorks
- Pro/Engineer
- SolidWorks Simulation
- 3D Via Composer

Some Offerings on CAD/ CAM Technology

We offer Corporate training on high-end CAD/CAM software. This training could be for organizations which are already using the software and require regular updated training or advanced training on the features or else for getting trained before the organization decides on a particular software. Special training programs are arranged for technical personnel at different levels, based on the organization training requirements. Training can be undertaken both at company site and at our fully equipped training center.

CAD Customization / CAD Automation

The customization includes conversion or modification of the general utility into a specialized, tailor-made application, which takes care of routine and repetitive operations making them simpler in an automated manner. A designer may require medium to higher skills to operate the CAD software. However, a manufacturing / engineering unit which involves repetitive product designs invariably benefits from customizing its routine design load by automating the design process.

🌀 Benefits of working with us 🌀

- Cost-effective Business Solutions
- Precision, Accuracy and Quality
- Experienced in handling offshore CAD projects
- Strong and Dedicated Work-force assigned for projects
- Mode of Transfer of Files is through FTP or Email
